

Before you print, set your "Page Scaling" option to "NONE."

Make sure that "Fit To Page" is **NOT** selected, as it will distort your measuring tape.

1

Cut out the measuring tape pieces using a pair of scissors. Do not cut off the sections labeled "glue or tape here".

2

Assemble the measuring tape. Using a glue stick or tape, affix the second section of the measuring tape to the first. Overlap the sections so the entire shaded "glue or tape here" areas are completely covered.

Wait till glue is dry before using.

3
